Absolutely NONE of the above information will be shared with anyone. When you join the group, YOU can decide what mailings you would like to receive. This information is used exclusively to make contact with you. Someone will call to give you the password. Your email is backup for contact only, as the password will not be sent electronically. This pdf method keeps you from being added to any on-line database so your information remains private. AND it keeps out the spam and the trolls.
